Band Shells and Amphitheaters

RCP Shelters offers a multitude of amphitheater designs in both laminated wood and steel. These band shells are engineered to local building code with a number of options, including straight or curved members, arches and enclosures for changing rooms or restrooms.

Features:

- ◆ Available in a variety of shapes and sizes
- ◆ In addition to our typical Bandshell ("BS") design, custom designs can be created
- ◆ A large number of our standard shelter models can be modified to suit the needs of an Amphitheater or Bandshell project. This is typically done by increasing the eave height of the shelter and sometimes adding a stage (provided by others) or rear wall for acoustic purposes
